FRENCH WHITE T-142
SR VALUE 75.49

PEARL WHITE T-143
SR VALUE 82.15

*SR - Solar Reflectivity is the ability of a material to reflect solar energy from its surface back into the atmosphere; these values are generated using test method ASTM E 1980.

Samples shown in sand textured finish and smooth finish, also available in other textured finishes. These sample reproductions are an approximation of color and do not denote the actual color or sheen and vary according to specific batch. Colors vary depending on lighting conditions, substrate, and exposure. When color matching is critical, an applied sample is required and all materials should be from the same batch. Special colors are subject to confirmation by TEX-COTE LLC.
